SUMMARY

Frontend and Full-Stack Developer with 2+ years of commercial experience building modern web applications using JavaScript, TypeScript, React, Next.js, Django, and Python. Experienced in developing responsive user interfaces, REST APIs, backend integrations, database-driven applications, automated testing, debugging, and software refactoring. Strong background in UI/UX design with Figma and a Bachelor of Science in Informatics focused on Graphic Design and Web Development. Experienced in Agile development teams and modern software development workflows, with additional experience in automated and manual testing. Currently pursuing an MSc in Software Engineering. Currently based in Poland and open to international opportunities, including remote, hybrid, on-site roles, and relocation.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
- **Frontend:** React, Next.js, Tailwind CSS, Responsive Web Design, UI Development
- **Backend:** Django, Django REST Framework, Node.js, Express, Prisma ORM, REST APIs, API Integration
- **Testing:** Playwright, Cypress, Behave, Automated Testing, Software Testing, Debugging, Regression Testing **Tools:** Git, GitHub, Docker, Postman, Swagger, Cursor AI, AI-Assisted Development
- **UI/UX and Design:** Figma, Adobe Creative Suite, Canva, UI/UX Design, Wireframing, Prototyping, Responsive Design
- **Development Practices:** Agile, Scrum, Code Review, Refactoring, CI/CD, Software Development Lifecycle

EXPERIENCE

- **Full-Stack Developer Intern** Jun 2026 – Present
Procforce Software House Remote
 - Built a full-stack QR code restaurant ordering and management platform with integrated payment functionality using React, TypeScript, and Prisma.
 - Redesigned and developed a responsive website for a basketball team using React and TypeScript, implementing reusable UI components and responsive layouts.
 - Collaborated with project managers, designers, and developers to plan and deliver web application features, creating and tracking GitHub issues while contributing to debugging, automated testing, manual testing, and software quality improvements.
- **Junior Full-Stack Developer** Jun 2024 – Jun 2026
Omnilexia Remote
 - Developed and maintained frontend features for a legal technology web application using React, Next.js, TypeScript, and Tailwind CSS.
 - Implemented responsive and reusable user interfaces and integrated frontend components with backend services and REST APIs.
 - Extended backend functionality using Django, and Django REST Framework, working with PostgreSQL databases, API development, and third-party service integrations.
 - Performed debugging, refactoring, performance optimization, and troubleshooting to improve application reliability and maintainability.
 - Created and maintained automated tests using Playwright, Cypress, and Behave to support software quality and regression testing.
 - Participated in Agile development workflows, code reviews, technical discussions, feature development, and collaborative problem solving.
- **Full-Stack, Graphic and UX/UI Design, Digital Marketing Intern** Feb 2024 – Jun 2024
Omnilexia Remote
 - Implemented frontend and backend features using React, Django, Python, TypeScript, and REST APIs.
 - Designed UI/UX prototypes and user interfaces in Figma to support product development and improve usability.
 - Created digital product assets and marketing materials using Adobe Creative Suite, Canva, and Figma.

EDUCATION

- **Master of Science in Software Engineering** 2025 – Present
Linnaeus University, Växjö, Sweden, Remotely
- **Bachelor of Science in Informatics (Graphic Design & Web Development)** 2022 – 2025
Jönköping University, Sweden
